

### Building Cross Section Aid

With proper detailing of building dimensions, material types, spans, sizes, spacing,  $F_b$  properties, etc., and strikeouts of non-applicable details, this cross section would provide an acceptable plan drawing. With the local inspection authority's permission, this drawing may be detailed by a designer and submitted as part of a plan package for plan review. ( $F_b$  - Fiber bending stress of selected lumber. Alternatively, grade and species information may be noted.)
